with:

Kelli Cummings, Chantal Dufour-Martel, Kathleen Petersen, Kelly Powell-Smith, Stephanie Stollar, and Joshua Wallin

Dynamic Measurement Group, Inc.

**Directions:** Make sure you have reviewed the scoring rules in the *DIBELS Assessment Manual* and have them available. Say these specific directions to the students:

 Before handing out the worksheets, say I am going to give you a worksheet. When you get your worksheet, please write your name at the top and put your pencil down. Hand out the Daze student worksheets. Make sure each student has the appropriate worksheet.

When all of the students are ready, say **You are going to read a story with some missing words.**For each missing word there will be a box with three words. Circle the word that makes the most sense in the story. Look at Practice 1.

Listen. After playing in the dirt, Sam went (pause) home, summer, was (pause) to wash her hands. You should circle the word "home" because "home" makes the most sense in the story. Listen. After playing in the dirt, Sam went home to wash her hands.

Now it is your turn. Read Practice 2 <u>silently</u>. When you come to a box, read all the words in the box and circle the word that makes the most sense in the story. When you are done, put your pencil down.

Allow up to 30 seconds for students to complete the example and put their pencils down. If necessary, after 30 seconds say *Put your pencil down*.

- 2. As soon as all students have their pencils down, say Listen. On her way home, she (pause) chair, sleep, saw (pause) an ice cream truck. You should have circled "saw" because "saw" makes the most sense in the story. Listen. On her way home, she <u>saw</u> an ice cream truck.
  - When I say "begin," turn the page over and start reading the story silently. When you come to a box, read all the words in the box and circle the word that makes the most sense in the story. Ready? Begin. Start your stopwatch after you say "begin."
- 3. Monitor students to ensure they are reading and circling the words. Use the reminders as needed.
- 4. At the end of **3 minutes**, stop your stopwatch and say **Stop. Put your pencil down.** Collect all of the Daze worksheet packets.

Timing	3 minutes. Start your stopwatch after you say "begin."
Reminders	If the student starts reading the passage out loud, say <b>Remember to read the story silently.</b> (Repeat as often as needed.)
	If the student is not working on the task, say <b>Remember to circle the word</b> in each box that makes the most sense in the story. (Repeat as often as needed.)
	If the student asks you to provide a word for them or, in general, for help with the task, say <i>Just do your best</i> . (Repeat as often as needed.)

Playing by the Rules	
Once in a while, a natural athlete is born. This is a person who has an unusual talent for a	1
sport. Tiger Woods one such person. He makes the game of golf look so easy, and people	4
love to watch him play. Another <b>natural</b> athlete was Bobby Jones. Bobby played many	6
years ago, but many young <b>golfers</b> still think of him as a <b>role</b> model today.	8
Bobby was born over one hundred years ago. Like Tiger, Bobby showed a talent for golf	10
at a <b>young</b> age. He was too short to <b>use</b> a real golf club, so somebody <b>sawed</b> a club in half for	13
him. Bobby never had a real golf lesson. Instead, he learned by imitating the best golfer at the	15
golf course near his house.	16
By age fourteen, Bobby was playing in tournaments. He was winning them, too! However,	18
he got angry easily. When he missed a shot, he would often yell and throw his club down. "To	20
me, <b>golf</b> was just a game to beat <b>someone</b> ," Bobby said later. "I didn't know that someone <b>was</b>	23
me."	23

With time, Bobby learned to control his temper. He became known for being a very fair	25
and honest player. Once , during a tournament, Bobby was getting ready to make a shot. When	27
he placed his club next to the ball, he accidentally moved the ball a tiny bit. This is	30
against the rules of golf, and <b>judges</b> assign a penalty to players who it. However, no one else	32
saw it happen, and the ball moved less than half an inch. But Bobby told the judges about it,	35
and asked them to <b>give</b> him the usual penalty. The judges <b>did</b> not want to do it, but	37
Bobby insisted.	38
As a result of the judges' decision, Bobby lost the tournament. But he did not mind. In	40
fact, when someone him for insisting on playing fairly, Bobby did not understand.	42
"There is only one way to play the game," he said. "You might as well praise a man for not	45
robbing a bank!"	45
People all over the country loved Bobby. But at age twenty-eight, Bobby stopped playing	47

golf. His	family a	and his	job	were moi	re importai	nt to him	than the	sport	. He is s	till reme	mbered	4
today as	one	of golf	s great	est player	·s.							5

The City Championship	
The name "City Champion" has a nice sound, doesn't it? At the beginning of last summer, I	
didn't think of myself as a champ. I had been a champion at anything. I soon learned,	3
though, what can happen as the result of a few months of hard work and practice.	5
My friends and I play basketball at the Youth Services Center almost every . Each	7
year the center hosts a summer event called Student Leaders Athletic Mentoring. Everybody calls this	8
the Summer SLAM for short. Workers at the center assign local kids to teams. Then each team	10
is <b>given</b> a coach who is a great <b>high</b> school player.	12
This year our coach Reggie Fox from Central High School. On the first day of	14
practice, Reggie lined us all up in a row. He said, "Everybody who wants to win the city	16
, raise your hand!" Of course, we all raised our hands. We could tell that Reggie championship	18
really wanted to win, too.	19
Last year our was easy on us, but that was definitely not the case this year.	21

Reggie made us run until our legs were sore. After practice he would always encourage us and	23
give us good advice. He would say, "Nothing that's worth anything comes easy. The harder you	26
work, the more you'll be rewarded."	27
By the time the Summer SLAM games rolled around, we were a great team. Before the	28
game began, Reggie huddled with us inside the gym. We went over all the plays and	30
watched the other team during their drills. Reggie seemed a little nervous. The other team was	33
coached by one of his teammates. They looked pretty good, too. Once the game started, though, all	35
of our worries melted away. We ran our plays perfectly. By halftime we were already	37
beating the other by twenty-one points. When the final blew, the scoreboard read	39
fifty to twenty-seven. We had the <b>biggest</b> win in SLAM history!	40
It was great winning the city championship, even though it a lot of hard work. I	42
wait until I'm in high school. I want to be one of the players who comes back to coach	45

during the Summer SLAM. I'll remember the lessons that Reggie brought with him this	last	47
summer, and I'll pass those along to a rew group of young players.		48

Making Chocolate	
What sweet treat do you enjoy? For Troy, it was chocolate. That <b>is</b> why he was so excited	1
when he found out his class was going to take a field trip to a chocolate factory. He would see	4
how his favorite was made. He could only hope he treat get a sample while he	6
was there!	7
When the students arrived at the factory, they went into a huge room. On the walls were a	9
lot of pictures of an unusual tree. Troy wondered what a tree had to do with chocolate. As if	11
reading Troy's <b>mind</b> , a guide came in and told them that <b>chocolate</b> begins with the cacao tree. It	13
grows in tropical rainforests.	14
The guide explained that <b>hanging</b> on the trees are fruits as <b>large</b> as melons. People pick these	16
fruits and split them open. Inside are seeds called beans, which workers scoop out and	18
put in big piles. After about a week, the beans' shells harden. Then they are ready to make	21
their long journey to the <b>factory</b> .	22

Troy saw that first the beans roasted in very hot ovens. The ovens didn't look like any	24
Troy had <b>ever</b> seen, but the roasting beans smelled <b>great</b> ! Next, the beans went into another	26
machine that took off the hard outer shells and left the inside parts, called nibs. The guide	29
explained that the nibs are the parts that go into the chocolate. Troy watched as the nibs went into	31
yet another machine. This machine crushed the nibs into a liquid. Troy was enthralled by the	33
dark liquid pouring out of the machine.	34
In the next part of the factory, Troy and the students watched as the liquid went into	36
what <b>looked</b> like a very large mixing bowl. The <b>liquid</b> chocolate got mixed with dry milk and	38
to make a thick chocolate paste. The chocolate passed through huge rollers. The	40
guide told them that this part of the process could take up to a week!	42
The class then moved on to see the already mixed chocolate get poured into molds	44
where it cooled and hardened. The last step was packaging. The students watched as	47

		7			7
rapped the chocolate bars. Finally, at the	e end	of the tour, the guic	de passed out	chocolat	e
amples to each student. Now that Troy	knew	here chocolate came	from, he thou		night
ke it better than ever.
