Make sure you have reviewed the directions in the *DIBELS Assessment Manual* and have them available. Say these specific directions to the student:

- ▶ I would like you to read a story to me. Please do your best reading. If you do not know a word, I will read the word for you. Keep reading until I say "stop." Be ready to tell me all about the story when you finish. (Place the passage in front of the student.)
- ▶ Begin testing. Put your finger under the first word (point to the first word of the passage). Ready, begin.

Timing	1 minute. Start your stopwatch after the student says the first word of the passage. Place a bracket (]) and say <b>Stop</b> after 1 minute.
Wait	If no response in 3 seconds, say the word and mark it as incorrect.
Discontinue	If no words are read correctly in the first line, say <b>Stop</b> , record a score of 0, and do not administer Retell.  If fewer than 40 words are read correctly on any passage, use professional judgment whether to administer Retell for that passage.
Reminders	If the student stops (not a hesitation on a specific item), say <i>Keep going</i> . (Repeat as often as needed.)  If the student loses his/her place, point. (Repeat as often as needed.)

#### **Building Happy Places**

0	What do you do when you go to a playground? Maybe you run as	14
14	quickly as you can to an empty swing, hop in, and soar to the sky. All	30
30	children like to play and do fun things. There are lots of different ways	44
44	to have fun. Matthew is a teenager who uses a wheelchair. He wanted	57
57	some cool things for the playground that all children could use, so he did	71
71	something about it.	74
74	When he was only six years old, Matthew had a great idea. He	87
87	thought of a swing that all kids could use. It looks like a big boat. It can	104
104	hold two kids in wheelchairs and six other children at the same time. He	118
118	called it The Dreamer. The challenge for Matthew was to look at all the	132
132	things on a playground and figure out how they could be made to work	146
146	with a wheelchair. That way all children could play together.	156
156	Matthew gives his time to a group that builds playgrounds that are	168
168	fun for all kids. The playgrounds have the usual swings that you would	181
181	find in most places. They also have swings like The Dreamer. Instead	193
193	of sandboxes on the ground, they have sand tables that children in	205
205	wheelchairs can use. Matthew helps the group raise money so they can	217
217	build more playgrounds. They built a special one called Friendship Place.	228
228	It was built at Matthew's school.	234
234	For his work helping other children Matthew has been given many	245
245	awards. He even had his picture on a cereal box. He feels proud that	259
259	what he does helps all children play together and makes everyone happy.	271

Many people enjoy flowers in outdoor gardens and in vases in their homes. Flowers come in all colors and sizes, and many flowers smell 24 pleasant. People buy roses for their sweet smell and beautiful color. A 36 rose may be red and small enough to hold in your hand. A sunflower 50 may be yellow and tower over your head. One kind of flower smells so 64 bad, many people hold their nose when they walk by! 74 Flowers are not just for us to enjoy. They have a job to do. Flowers 89 make seeds for the plant. When the seeds are released, they grow into 102 new plants. 104 While there are many different kinds of flowers, they all have some 116 parts in common. Most flowers have petals. Petals are the colorful parts 128 we admire. Petals attract insects to the flower. Insects follow the petals 140 to get nectar. Nectar is a rich food for the insects. The nectar is at the 156 bottom of the petals. 160 When an insect lands on the petals to get nectar, it also touches 173 the stamens. These flower parts stick up inside the flower. Their tips are 186 usually yellow and have pollen on them. As the insect gets nectar, pollen 199 sticks to its body. When the insect goes to another flower for more 212 nectar, it takes the pollen with it. 219 At the other flower, the insect will land on the petals. Some of the 233 pollen it carries will come off on the other flower. Now this flower will 247

#### Luke Makes His Move

Atter moving to a new neighborhood, Luke wanted to make some	11
new friends. In his old neighborhood, all of his friends had played street	24
hockey. Luke hoped to find someone to play street hockey.	34
Luke's stepdad had an idea. He said they should explore the	45
neighborhood and see if they could find a game of street hockey.	57
Luke thought it was a great idea. He and his stepdad went outside and	71
walked around. After a short while, they turned the corner and found	83
children playing hockey. It was just like his old home.	93
Luke stood on the side and watched the others play. He cheered for	106
both teams whenever they made a goal or a difficult play. When one	119
of the players had to go home, he asked Luke to play. Luke ran home to	135
get his skates and stick.	140
Luke played goalie, his favorite position. He played his very best. He	152
only let the other team score one goal. One time the other team was	166
about to score and there was no one but him to defend the goal. The	181
other team came toward Luke, faster and faster. He watched carefully	192
to see where they were going to go. He leaped at the last second and	207
stopped them from scoring. His whole team cheered.	215
After the game, they all went down to the corner store and got a	229
snack. Everyone talked about the game. They decided to play again the	241
next day. Luke was alad he had made new friends.	251

#### African Drums

0	When you listen to a song, what do you hear? Many people enjoy	13
13	the beat of the drum. In Africa, drums are important. They are used in	27
27	music, but they are also used to talk to people.	37
37	There are many different types of African drums. They come in all	49
49	shapes and sizes and each one makes a special sound. Some African	61
61	drums have an animal skin stretched across a wood base. People hit the	74
74	skin with their hand or with a stick to make sound. Other African drums	88
88	are logs with slits carved in them. People hit the slits or scrape a stick	103
103	over them to make sound. A third type of African drum is like a rattle.	118
118	People shake it to make sound.	124
124	In some parts of Africa, people use talking drums. These drums do	136
136	not really talk, but their beats give a message. One drum beat is used	150
150	when a baby is born. People hear the drum beat and know that a new	165
165	baby has come into the world. Other drum beats say that someone is	178
178	visiting or that two people have gotten married. Many people might	189
189	drum the rhythms at the same time.	196
196	African drums are also used to celebrate special events. Dancers	206
206	often do a certain dance for each event. The dancers may wear rattles	219
219	on their wrists and ankles. As they dance, the rattles make noises that	232
232	add to the sound of the drum beat.	240
240	While you may enjoy the sound of African drums, their beats also	252
252	mean many things.	255

#### My Pen Pal

0	I have a pen pal who lives in a faraway place. He lives all the way	16
16	across the ocean in a different country. He tells me about what it is like	31
31	to live in his country. I tell him about what it is like to live in mine. I live in	51
51	India. In many ways, our lives are very similar. We both go to school and	66
66	both enjoy listening to music. There are also ways in which our lives are	80
80	different.	81
81	My pen pal and I usually write to each other at least once a month,	96
96	but I waited longer to write him a letter this month. I was waiting for $\ensuremath{my}$	112
112	loose tooth to fall out. I wiggled my tooth a lot. It didn't want to come	128
128	out. I tried different tricks, but they did not work. At last, while I was	143
143	eating something sticky, the tooth came out.	150
150	Then I tossed my tooth up on the roof. I asked a sparrow to take	165
165	the tooth and give me a new one. This was a custom in my country.	180
180	When a new tooth began to grow I thanked the sparrow.	191
191	I wrote a long letter to my pen pal about losing my tooth. He wrote	206
206	back and told me about his tradition when he loses a tooth. He said he	221
221	puts the tooth under his pillow. During the night someone takes the tooth	234
234	away. What a strange custom! I like learning about different countries.	245

#### Canoe Fun

0	The summer sun was shining and there were no clouds in the sky.	1
13	It was a perfect day to try out our new canoe at the lake. We put the	3
30	canoe in the water close to the shore and put on our life jackets. Then	4
45	we grabbed the paddles and got into the canoe.	5
54	I had never been in a canoe, and I had a lot to learn about how	7
70	to paddle one. The most difficult part was paddling in a straight line. My	8
84	seat was in the middle of the canoe. I paddled until I got tired. Then	9
99	Mom and Dad let me rest.	10
105	As the canoe skimmed along the water, there was a lot to see. I	11
119	counted leaves that were floating in the water. I saw a turtle sunning	13
132	himself on a rock. We all laughed when a fish jumped out of the water	14
147	directly in front of the canoe. "Look!" said Dad suddenly. We followed his	16
160	pointing finger and saw a golden eagle sitting in the top of a tall tree.	17
175	We were all so busy paddling and enjoying the sights that we didn't	18
188	notice the clouds forming. "Looks like it might rain," said Dad. "We better	20
201	head back to shore." We turned around and paddled hard. On the way	21
214	back, I didn't take a rest, even though I was tired.	22
225	We reached the shore and got out of the canoe. As soon as we	23
239	got in the car, the first raindrops started to fall. We all cheered. We had	25
254	made it back just in time.	26

I live by a big river. The river is very important to my family. My 15 name is Ling, and I live in a village in Asia. There are thirty houses in my 32 village. We use the water to wash ourselves and our clothes. We also use the water for our plants since a lot of our food comes from crops we grow. The river gives us water for drinking, too. Our boats travel up and 75 down the river, taking us from village to village. We also play in the river! You may wonder what life is like for me. I wake up to a rooster 105 instead of an alarm clock. Our rooster wakes us at four in the morning, 119 and we immediately get busy. I help prepare breakfast for the rest of 132 the family. After we eat, we feed the animals. Sometimes there is corn to 146 grind. When I finish these chores, I go into the field to help where I can. 162 The younger kids stay home with our grandparents. 170 In our village, children are expected to help the family. There is 182 always work to do. On days when I am not helping in the field, I babysit 198 or clean the house. In the evening, I help gather firewood to cook our 212 dinner. After dinner, we sit with our grandparents. They tell us stories 224 about how things came to be. My favorite story is how the river got its 239 color. I hope one day I can share the story with you. 251

#### A Gift of Chores

0	For a week, Will and Max had been talking about how to celebrate	13
13	Mom's birthday. The brothers had many grand ideas, such as buying	24
24	Mom a ring or sending her on a trip. However, there was one problem.	38
38	The boys did not have any money. What could they possibly give Mom	51
51	that did not cost a lot?	57
57	Finally, at dinner, Will and Max had an idea. It happened just after	70
70	the family finished eating. The boys cleared the table as they always do.	83
83	Mom began washing the dishes. As she did, she let out a huge sigh and	98
98	said she wished the dishes would wash themselves. Will and Max looked	110
110	at each other. They both had the same great idea! They would make a	124
124	chore coupon book for Mom.	129
129	First, the brothers made a list of chores such as washing the dog and	143
143	taking out the trash. Then they began making coupons from colored	154
154	paper. They cut pieces of paper in the size of dollar bills. Each boy made	169
169	five coupons for chores and a cover for the book. Then they stapled	182
182	them all together and wrapped the book.	189
189	The next morning, the boys gave Mom her present. She opened it	201
201	and read the cover. She flipped through the coupons. She exclaimed,	212
212	"This is the best present anyone has ever given me!" The boys felt happy	226
226	and proud.	228

#### A Day for Trees

0	Picture yourself walking through the woods. Rays of sun stream in	11
11	through the trees, but mostly it is shady. You welcome the coolness of	24
24	the shade. The leaves crunch under your feet, and animals scurry about.	36
36	Now think about what this scene would be like without any trees. Is	49
49	it hard to imagine? Trees are very important. They give us shade. Trees	62
62	are home to many animals. Trees help keep our air clean, too.	74
74	Trees are so important that they have their own special day. It is	87
87	called Arbor Day. On this day, people plant trees. Some people choose	99
99	to plant a tiny seed in the soil. They give the seed water and watch	114
114	it grow. Other people choose to plant a small tree that has already	127
127	started to grow. They dig a small hole and carefully put the roots into the	142
142	soil. They cover up the roots and give the tree water.	153
153	You may wonder when Arbor Day happens. That depends on	163
163	where you live. Many states have this special day in the spring. That	176
176	is the best time to plant trees in those states. Some states have better	190
190	times for planting trees. If you live where the weather is always warm,	203
203	your special tree day may be in the fall or even in the winter. No matter	219
219	when your state has its special tree day, make sure you plant a tree.	233

#### A Happy House Plant

Do you have plants in your home? There are many reasons why you 13 should. Plants improve the air in your home. They also make your home look more inviting. In addition, many people enjoy taking care of plants 38 in their home. It can be a great way to relax! 49 If you have decided to put a plant in your home, the first thing to 49 do is decide what kind of plant to buy. If you go to a plant store, you will find many different kinds of plants to choose from. Many people choose a spider plant. 97 94 You can probably guess what a spider plant looks like. The plants 97 109 often grow in hanging baskets. They have green stalks that grow quite 121 109 long, past the bottom of the container. Eventually, small plants will begin 133 121 to grow at the ends of the stalks. The small plants look like spiders. If you 133 149 cut off the small plants and place them in fertile soil, they will grow into 149 new spider plants. 167 164 Spider plants are easy to care for. They need to be planted in a rich 182 167 soil. Make sure the container has small holes in the bottom. When you 195 water the plant, the holes let the extra water drain out. Spider plants 208 195 do not like to sit and grow in wet soil! The soil should feel dry before you 208 give the plant more water. A spider plant grows well in almost any kind 239 225 of light. Keep it in a warm place, too. If you follow these tips, you will likely 256 239 have a wonderful houseplant to enjoy for a long time. 266

#### Making Orange Juice

0	What is the best part about eating an orange? There are many	12
12	things to choose from. Your eye may notice the fruit's bright orange skin.	25
25	Just the sight of an orange may be enough to make your mouth water!	39
39	When you peel off the rough skin, the sweet smell tickles your nose.	52
52	When you bite into the fruit, the juice wakes up your taste buds.	65
65	There is another way to enjoy the taste of an orange. You can make	79
79	orange juice. Making orange juice is easy and fun, and you only need a	93
93	few things. You need six oranges, and an adult to help cut them. You will	108
108	also need a pitcher and some cups.	115
115	First, squeeze the oranges to get them soft. Then wash the oranges.	127
127	Have the adult help you cut the oranges in half safely. Take out the	141
141	seeds from each half. Now you are ready to squeeze out the juice. Grip	155
155	half an orange and squeeze the juice into a pitcher. Turn the orange	168
168	and squeeze again. Keep squeezing until no more juice comes out.	179
179	Repeat with each orange half.	184
184	You have some choices when you make orange juice. If you like,	196
196	you can scrape the orange with a spoon and add the fruit to the juice.	211
211	Or if you do not like pulp, place a strainer over the pitcher. This will	226
226	catch all the orange bits, and only juice will fall into the pitcher. If you	241
241	want cold orange juice, add ice to the pitcher.	250
250	Now you are ready to pour the orange juice into a cup. You may	264
264	want to share with a friend. Drink the juice and enjoy!	275

0	How do you get to school? Do you ride a school bus or travel by	15
15	car? Do you ride a bike or walk? Do you think about how children	29
29	around the world get to school? Some children arrive at school just like	42
42	you do. Others have a very different journey.	50
50	Like American children, many students around the world walk to	60
60	school. However, it may take them an hour or more to get there. Then	74
74	they make the same walk home when school is over.	84
84	Do you know anyone who travels to school in a boat? Some	96
96	children live in fishing villages. Their school is a large houseboat in the	109
109	middle of a river or other waterway.	116
116	There are families around the world who travel from place to place	128
128	following cattle they own. Many of these people use camels to move	140
140	from place to place. For many of these children, their school and their	153
153	teacher travel with them. The children learn while they travel.	163
163	Some children live on mountains. There may not be a school nearby.	175
175	These children do not travel to school at all. Instead, school comes to	188
188	them on a radio. They do not hear music over the airwaves. They hear	202
202	lessons in math and other school subjects.	209
209	The next time you travel to school, think about other children around	221
221	the world. What would it be like to go to school in a different way?	236

#### Kim Gets Ready

0	What is your house like in the morning? In my family, the morning is	14
14	a busy time. We children get ready for school while my dad and uncle	28
28	get ready for their jobs. They are fishermen. My name is Kim, and I live	43
43	in a country called Vietnam.	48
48	In the morning, my family eats breakfast together. We do not use	60
60	plates or forks. Instead, our table is set with deep bowls and chopsticks.	73
73	For breakfast, we may eat soup or rice with meat or fish. We often have	88
88	fruit, too.	90
90	After breakfast, we put on our school uniforms. Then my sister and	102
102	I ride our bikes to our school. My older sister and brother walk to their	117
117	school. Because they are older, they go to a different school.	128
128	Where I live, children go to school six days a week. We do not go	143
143	to school on Sundays. In my classroom, I sit with one other child at a	158
158	desk. There are 30 children in my class. We have lessons in math and	172
172	language. We also learn about science and history. Each day, we take	184
184	a break from our lessons and do gymnastics. School teaches us to be	197
197	active.	198
198	Students in my school also learn to be responsible. We take turns	210
210	cleaning. When it is my turn, I get to school early. I may sweep the floor	226
226	or empty the trashcans.	230

#### Wind Power

The wind is a source of power. It helps kites to fly, and boats to 15 sail. In some places, wind power is used to make electricity. People are 28 working to find ways to help us get more power from the wind. 28 41 There are many reasons why turning wind into power can be a 41 53 good idea. We will never run out of wind. It will always blow. Most other 53 68 ways to make power use resources that could run out. Coal and natural 68 gas are two common examples. One day we might run out of them. We 81 can count on the wind because it will always blow. 105 Windmills are what help us turn wind into electricity. When the wind 105 117 blows, it turns the blades on the mill. This spinning makes a small amount 131 117 of electricity. When you put a lot of windmills together, you can make 131 144 enough power for a lot of people. 144 151 A wind farm is a place with a lot of windmills. You can find wind 151 166 farms in places that are very windy. The windmills are very tall, and their 180 166 blades are very long. Some have blades that are as long as a football 180 194 field. 195 194 There are a few problems with wind power. Some days there is not 195 much wind, and you may flip a light switch and have no light. Also, wind power costs more than other kinds of power. People are working to fix 236 223 these problems. One day, when you turn on your bedroom light, your 248 236 lamp may light up due to power from the wind. 258

#### Dear Diary

0	Dear Diary,	2
2	Today is Monday. We're playing basketball in gym class tomorrow. It	13
13	is sure to be the worst day of my life! Today we learned the game's rules,	29
29	and tomorrow we play. I'm hoping I won't have to play. Maybe I will get	44
44	sick. I did cough earlier today.	50
50	I tried to tell the teacher that I'm good at tap dancing, not	63
63	basketball, but she wouldn't listen. She told me to try my best.	75
75		75
75	Dear Diary,	77
77	Today is Tuesday. Believe it or not, today was one of my better	90
90	days. When I woke this morning, I asked Dad to take me to the dentist,	105
105	the doctor, or anyone as long as it was during PE class. Dad would not	120
120	agree, and instead, he gave me basketball tips. I tried to listen, but the	134
134	sound of my pounding heart filled my head.	142
142	All day I suffered, waiting for gym class. Each minute felt like an	155
155	hour. Finally, we lined up and walked to the gym.	165
165	Soon I was holding a basketball, bouncing it up and down. When we	178
178	took our practice shots, the teacher showed me how to shoot the ball.	191
191	The first time I tried, the ball went in the basket! I started to believe that	207
207	maybe I could play basketball.	212
212	Once the game started, time passed quickly. I was surprised when	223

#### In Space for an Hour

I went to a movie where I felt like I was really in space. I had	16
always wondered what it would feel like to travel in a rocket. After my	30
experience, I can imagine it even better.	37
We were on vacation visiting my mother's sister in a big city. We	50
don't get to go to the city very often, so my aunt said she would take	66
us to all the special things that we don't have at home. I was surprised	81
when my aunt said we were going to a movie. I told her that we had	97
movies at home. My aunt just smiled. She said this was a special type of	112
movie.	113
The theater looked like any other until we went inside. The screen	125
was enormous. It had to be the biggest screen I'd ever seen. It went	139
from the floor to the ceiling, and it curved. I stared in astonishment.	152
"What is this going to be like?" I wondered.	161
Then the lights went out. Suddenly we felt like we were inside a	174
space shuttle. We heard the countdown. We heard the roar of the	186
rockets. When they called, "Blast off!" it felt like we had really blasted off.	200
It looked and sounded so real. For one hour I felt I was on a space $$	216
mission. We went all the way to the moon and back. It was a trip $I^\prime I$	232
always remember.	234

#### Circus Tickets

The sign said, "Get a free ticket to the circus." Jake showed the sign to his brother, Adam. The library wanted to encourage children to keep reading in the summer. Any student who read five books would be given a free ticket to the circus. The boys had never been to the circus. It was something they had always wanted to do. They showed the sign to their 68 mother. She agreed to take them to the library to get books to read. 82 The brothers went to their local library for the first time. With help 82 95 from their mother, they got library cards. Then they began looking for 107 books. Jake did not know what to read. He searched the shelves and 120 found a biography about a swimmer. Jake loved to swim. He glanced 132 through the book and thought it was something he would enjoy reading. 144 Adam was not sure what to read either, but he found a mystery that he 159 thought would be good to read. 159 165 Back at home, the boys sat on the couch and started reading. It 178 165 was quiet in the room. They thought they would be bored without TV, 191 but they were wrong. They read for an hour until their mother called 204 them to dinner. 207 204 Jake and Adam quickly finished their books. They went back to 207 218 the library for more. In two weeks, they had read five books and 231 218 earned their circus tickets. When the circus came to town, they proudly 243 231 presented their tickets at the ticket booth. On the way in, a clown gave 257 243 them a high five. It was going to be a great show! 269

170

183

210

Children enjoy reading books, but very few have written one. It 11 is not hard to do. All you need is some paper and colored pencils or 26 markers and a good idea. You can create your own book. 37 You may already have a great idea for your book. If not, you can write a book that tells something about yourself. You can write how old 64 you are, what color your hair and eyes are, and how tall you are. You 79 can paste a picture of yourself to the page. If you don't have a picture, 94 draw one. Next, write about your school. Write down your grade, 105 teacher's name, and what you are learning. Draw a picture of your 117 teacher or of your favorite school subject. On the next page, you can 130 write about your friends. Or, you can write about things you like to do at 145 home. You can also write about your favorite food, movie, or book. 157 These are just some ideas of what to include in your book. There 170 are many more things you can write about. Think about a story you 183 would like to tell. Tell about things that interest you. You might get other 197 ideas from looking in books. When you are done with your book, staple 210 the pages together. You could also punch holes in the pages and tie 223 them together with yarn. As you can see, making a book is fun and easy. 238

#### Bats Are Not Birds

0	What has wings and can fly? If you said a bird, you are correct, but	15
15	another correct answer is a bat. Bats and birds are both animals that	28
28	have wings and can fly. While they have some things in common, they	41
41	are also different in many ways.	47
47	Birds have feathers and lay eggs in a nest. The baby birds hatch	60
60	from the eggs. Bats do not have feathers and do not lay eggs. They are	75
75	mammals. Like other mammals, bats have fur on their bodies. The baby	87
87	bats drink milk from their mothers. They do not live in a nest, but in caves	103
103	and trees.	105
105	If you were to look at the bones of a bat and a bird, you would	121
121	notice differences. A bat's bones look like the bones in your own arm	134
134	and hand. The bones look like long fingers. Instead of feathers, a thin	147
147	skin covers the bones. A bird's bones are shorter. They are covered and	160
160	supported by feathers.	163
163	You can see another difference between bats and birds when you	174
174	look at their mouths. Most bats have teeth to chew insects or fruit. Birds	188
188	have bills. Their bills have different shapes depending on what they eat.	200
200	A final difference is when you see the animal flying. Do you see	213
213	something flying at night? It may be a bat. They fly at night using echoes	228
228	instead of sight. Birds usually fly during the day. Some have a very keen	242
242	sense of sight.	245

#### Cooking School

0	Cheese and crackers make a great snack, but not if you eat them	13
13	every day. When Jake came home from school, he ate cheese and	25
25	crackers. One day, he told his grandmother Nana he was tired of the	38
38	same snack. He asked her to teach him how to make a different snack.	52
52	When a smile spread across Nana's face, Jake wondered what she was	64
64	thinking.	65
65	Nana told Jake to wash his hands. Then she told him to get peanut	79
79	butter while she got non-fat dry milk and honey. They mixed the three	92
92	foods together. Then Nana told Jake something surprising. She told him	103
03	to play with his food! Jake molded the dough into a dinosaur and then	117
17	into a flower. Then he ate the dough! "That was fun!" Jake said.	130
30	The next day, Jake told his friends about Nana's cooking lesson. They	142
42	all wanted to have a lesson from Nana, too. Jake talked to Nana about	156
56	his friends' requests, and they decided to have a cooking school.	167
67	Jake and his friends gathered in the kitchen on Saturday. Nana	178
78	had an apron for each child. She had four stations set up. At each	192
92	station, the kids learned how to make a healthy and delicious snack.	204
04	The children had so much fun, they asked Nana to have cooking	216
16	school once a month. Nana was happy to agree. No more cheese and	229
29	crackers for Jake!	232
